

The magic sliding screen door that refuses to stay open!

Minimise the possibility of dengue fever and other mosquito and insect diseases with the **Inventco Water Door Closer**

POOL Safety

The Inventco door closer in combination with a conforming pool fence, maximizes protection of 'at risk age' children around swimming pools.

Drownings frequently occur due to (non swimming) children overcoming barriers to the pool despite the quality of the pool fence and gate.

Pool death statistics show two frequent causes of death:

- that the victims siblings, or visiting children Intentionally or unintentionally leave the pool gate ajar,
- that the non swimmer child drags a table or chair, and climbs the fence into the pool water area.

The Inventco Water closer can provide complete peace of mind knowing that an 'at risk' child remains physically and safely within the confines of the home.

Another good reason to install the Inventco Sliding Water Door Closer.

Inventco automatic sliding water Doorcloser for Security, Screen and some glass doors.

Patent Pending

[more...](#)
